

Tania Murphy - The University of Adelaide

Adelaide has %8.8 vacant houses, rest of SA %23.6 (*Census 2016*). These are potential houses that can accommodate people who are homeless?

391 visions for safety, shelter and a place to call home

Who are these people that blend into the night?

Somebody's father, daughter, child

Wanting to belong and live with pride

But faced with despair of a lonely and cold life.

These are the forgotten and lost lives of our city

That promises many opportunities and prosperity.

Portraying instead stories of symbolic hierarchy

And the shattered lives of the homeless many.

Solutions of charity and good intentions abound

When what is necessary is a home that is sound

Solved easily with the empty housing stock around

Scattered throughout Adelaide and SA surrounds.

While Shadows of night fill these empty dwellings

People sleep outside on the pavement as bedding,

When turning on the lights of these houses that are empty

Could provide shelter, safety and homes for many.
